Description

Four features of

STLOCK: Coined word of "Strong" + "Lock" + "Hexagon (rokkaku in Japanese)"

STLOCK series strong-shaft sockets

STLOCK36 • STLOCK18

 STLOCK 36: 36 V model of STLOCK series (compatible with 18 V)
 STLOCK 18: 18 V model of STLOCK series

STLOCK Point①

Provides break resistance owing to the long shaft effect and use of purpose-specific steel of high durability.

Long shaft

As the shaft is longer than that of conventional models, load applied to the shaft is dispersed, resulting in break resistance. (Torsion effect)
 Applicable with high-power impact screwdrivers because of the use of purpose-specific steel of high durability.
 Target: Standard (High durability type)

STLOCK Point②

Excellent torque is obtained by hexagon press-fitting.

Hexagon press-fitting

Press-fitting the hexagon shaft into the hexagon hole
 Excellent torque transmission, similar to that obtained via surface contact with the X-DRIVE adjustable angle wrench
 Target: Standard, short, P-cone, form tie, full-thread types

Hex press-fitting part

STLOCK Point③

Lightest weight model in the industry

Light weight

Worker load reduction, resulting in work efficiency improvement
 Up to 30% weight reduction (in comparison with our conventional model)* (* Compared with conventional model DSX24S with 24 mm width across flats)

STLOCK Point④

Identification of size by label color

Size identification on by color

Width across flats is color-coded for easy identification in the field.
 Target: Standard, short, long, light gauge steel, universal, universal long and P-cone types

Other features
Short

Overall length is short. (Short type)

Long

Overall length is long. (Long type)

30° universal

Head swing type

9.5mm 14mm double grooves

The joint part is applicable to two sizes.

Deep hole

The socket hole is long. (Deep socket type)

Features of opening shape
Hexagon

The hexagon type can grip nuts/bolts securely by surface contact, without damaging nut/bolt edges. Principal shape of electric drill socket.

Dodecagon

The dodecagon type is easy to fit over bolts/nuts, resulting in work efficiency improvement. Surface contact does not cause damage to nut/bolt edges.

Surface

Pursuing surface contact, the surface type can securely grip even damaged nuts/bolts. The socket is easy to fit over nuts/bolts, resulting in work efficiency improvement.

Standard socket (High durability type)
